Research Papers

A bacterial position effect: when the F factor in *E. coli* K12 is integrated in *cis* to a chromosomal gene that is flanked by IS*1* repeats the elements are activated so that amplification and other regulatory changes that affect the gene can occur
C.K. Clugston and A.P. Jessop (Great Britain) 1

Bimodal distribution of sensitivity to SCE induction by diepoxybutane in human lymphocytes. I. Correlation with chromosomal aberrations
J.K. Wiencke, D.C. Christiani and K.T. Kelsey (U.S.A.) 17

Bimodal distribution of sensitivity to SCE induction by diepoxybutane in human lymphocytes. II. Relationship to baseline SCE frequency
K.T. Kelsey, D.C. Christiani and J.K. Wiencke (U.S.A.) 27

Genotoxic and cell-transforming properties of (*trans,trans*)-muconaldehyde
D. Henschler, E. Eder, B. Epe and D. Schiffmann (F.R.G.) 35

Vinblastine-induced numerical chromosome changes and selection processes in mouse bone marrow cells
B. Gustavino, B. Bassani and F. Pacchierotti (Italy) 45

Environmental stresses and mobilization of transposable elements in inbred lines of *Drosophila melanogaster*
C. Arnault, A. Heizmann, C. Loevenbruck and C. Biémont (France) 51

Sister-chromatid exchanges in lymphocytes from infants with Down's syndrome
E.K. Shubber, H.A. Hamami, B.M.A. Allak and A.H. Khaleel (Iraq) 61

The effects of radon daughter α-particle irradiation in K1 and xrs-5 CHO cell lines
J.D. Shadley, J.L. Whitlock, J. Rotmensch, R.W. Atcher, J. Tang and J.L. Schwartz (U.S.A.) 73

First characterization of the mutagenic specificity of 7-methoxy-2-nitronaphtho[2,1-*b*]furan (R7000) in *Salmonella typhimurium*
P. Quillardet, E. Touati and M. Hofnung (France) 85

Evidence for acrolein-modified DNA in peripheral blood leukocytes of cancer patients treated with cyclophosphamide
M.A. McDiarmid, P.T. Iype, K. Kolodner, D. Jacobson-Kram and P.T. Strickland (U.S.A.) 93

5-Azacytidine inhibits the induction of transient TK-deficient cells by 5-bromodeoxyuridine. A novel hypothesis for the facilitation of hypermethylation by 5-bromodeoxyuridine
K.M. Call and W.G. Thilly (U.S.A.) 101

Structural chromosomal rearrangements in *Hpa*II-treated human lymphocytes
B. Tedeschi, B. Porfirio, D. Caporossi, P. Vernole and B. Nicoletti (Italy) 115

Measurement of neutron-induced genetic damage in mouse immature oocytes
T. Straume, T.C. Kwan, L.S. Goldstein and R.L. Dobson (U.S.A.) 123

Mechanism of quinolone mutagenicity in bacteria
E. Gocke (Switzerland) 135

Induction of chromosomal aberrations and SCE by chloramphenicol
I. Sbrana, S. Caretto, G. Rainaldi and N. Loprieno (Italy) 145

Chromosome damage and non-disjunction measured at the first cleavage division in normal and chromosomally mutant female mice irradiated at the diakinesis stage of female meiosis
P. De Boer and F.A. Van der Hoeven (The Netherlands) 155

Biologic markers in ethylene oxide-exposed workers and controls
J. Mayer, D. Warburton, A.M. Jeffrey, R. Pero, S. Walles, L. Andrews, M. Toor, L. Latriano, L. Wazneh, D. Tang, W.-Y. Tsai, M. Kuroda and F. Perera (U.S.A., Sweden) 163

Modulation by Co(II) of UV-induced DNA repair, mutagenesis and sister-chromatid exchanges in mammalian cells
A. Hartwig, R.D. Snyder, R. Schlepegrell and D. Beyersmann (F.R.G., U.S.A.) 177

Somatic mutation in the wings of *Drosophila melanogaster* females dysgenic due to P elements when reared at 29°C
C. Getz and N. Van Schaik (Republic of South Africa) 187

Clastogenic action of ellipticine over the cell cycle of human lymphocytes and influence of posttreatments with caffeine and ara-C at G_2
E.T. Sakamoto-Hojo and C.S. Takahashi (Brazil) 195

The paternal genome in mouse zygotes is less sensitive to ENU mutagenesis than the maternal genome
L.B. Russell and J.W. Bangham (U.S.A.) 203

Special Issue

Early Indicators of Non-Genotoxic Carcinogenesis

Preface
I. Purchase and M. Mercier (Belgium and Switzerland) 211
Overview
Scientific and Organising Committee 213
Validity of considering that early changes may act as indicators for non-genotoxic carcinogenesis
B. Hildebrand, P. Grasso, J. Ashby, M. Chamberlain, R. Jung, A. Van Kolfschoten, E. Loeser, E. Smith and W.J. Bontinck (F.R.G., Great Britain, The Netherlands, Switzerland, Belgium) 217
Determination of the genotoxic status of a chemical
J. Ashby (U.K.) 221
NTP carcinogens – interpretational problems
E.E. McConnell (U.S.A.) 233
Preneoplastic lesions in rodent kidney induced spontaneously or by non-genotoxic agents: predictive nature and comparison to lesions induced by genotoxic carcinogens
D.R. Dietrich and J.A. Swenberg (U.S.A.) 239
Early indicators of bladder carcinogenesis produced by non-genotoxic agents
R.L. Anderson (U.S.A.) 261
Evidence for and possible mechanisms of non-genotoxic carcinogenesis in rodent liver
P. Grasso and R.H. Hinton (U.K.) 271
Early indicators of exocrine pancreas carcinogenesis produced by non-genotoxic agents
R.A. Woutersen, A. Van Garderen-Hoetmer, C.B.H.W. Lamers and E. Scherer (The Netherlands) 291
Neuroendocrine cell hyperplasia and neuroendocrine carcinoma of the rodent fundic stomach
D. Poynter and S.A.M. Selway (U.K.) 303
Early indicators of potential neoplasia produced in the rat forestomach by non-genotoxic agents: the importance of induced cellular proliferation
D.B. Clayson, F. Iverson, E.A. Nera and E. Lok (Canada) 321
Evidence for and possible mechanisms of non-genotoxic carcinogenesis in mouse skin
A.J. Ingram and P. Grasso (U.K.) 333
Early indicators for carcinogenesis in sex-hormone-sensitive organs
F. Neumann (F.R.G.) 341
Evidence for and possible mechanisms of non-genotoxic carcinogenesis in the rodent thyroid
G.A. Thomas and E.D. Williams (U.K.) 357
The search for molecular mechanisms of non-genotoxic carcinogens
S. Green (U.K.) 371
